## Aerobic Treatment Units (ATU) and Performance-Based Treatment Systems (PBTS) Construction & Operation

- Wastewater Treatment Standards
- Treatment System Determinations
- ATU Standards and Effluent Characteristics
- PBTS Standards and Effluent Characteristics
- Operating Permit Requirements
- Annual Operating System Inspections
- Maintenance Entities
- System Maintenance Requirements

4

---

---

---

---

---

---

---

---

---

---

---

---

### ATU and PBTS Standards are outlined in:

► Construction, Permitting, Operation, and Maintenance Standards:

- In rule:
  - 64E-6.012 (ATUs)
  - 64E-6.025 through .0295 (Performance-based and Innovative Systems)
- In Florida Statutes:
  - 381.0065(3)(f),
  - 381.0065(4),
  - 381.0655(2)(c),
  - 381.0066(2),

64E-02	STANDARDS FOR THE CONSTRUCTION, OPERATION AND MAINTENANCE OF AEROBIC TREATMENT UNITS	4
PART IV	PERFORMANCE-BASED TREATMENT SYSTEMS	4
64E-03	DEFINITIONS	4
64E-04	APPLICATIONS FOR INNOVATIVE SYSTEM PERMITS AND SYSTEM CONSTRUCTION PERMITS	4
64E-05	FEES	4
64E-06	LOCATION AND INSTALLATION	4
64E-07	INSPECTIONS	4
64E-08	INNOVATIVE SYSTEM REPLACEMENT	4
CHAPTER 381.006	F.S. ONSITE SEWAGE TREATMENT AND DISPOSAL SYSTEMS REGULATION	10
CHAPTER 381.0065	F.S. CONNECTION OF EXISTING ONTO CENTRAL SEWERAGE SYSTEM REQUIREMENTS	10
CHAPTER 381.0066	F.S. ONSITE SEWAGE TREATMENT AND DISPOSAL SYSTEMS FEES	10

The standards outlined in these sections can be summarized as follows:

5

---

---

---

---

---

---

---

---

---

---

---

### Wastewater Treatment Standards:

POLLUTANT	EXISTING STANDARDS	EXISTING STANDARDS as amended	MINIMUM UNIT	SECONDARY TREATMENT STANDARDS	ADVANCED TREATMENT STANDARDS	ADVANCED TREATMENT STANDARDS
BOD <sub>5</sub> (5-day BOD at 20°C)	100 mg/l	< 5 mg/l	mg/l	mg/l	mg/l	mg/l
SS (suspended solids)	100 mg/l	< 5 mg/l	mg/l	mg/l	mg/l	mg/l
TN (total nitrogen)	15 mg/l	15 mg/l	mg/l	mg/l	mg/l	mg/l
TP (total phosphorus)	6-10 mg/l	< 5 mg/l	mg/l	mg/l	mg/l	mg/l
total coliforms	not tested	not tested	mg/l	mg/l	mg/l	mg/l
fecal coliforms	not tested	not tested	mg/l	mg/l	mg/l	mg/l
total suspended solids	not tested	not tested	mg/l	mg/l	mg/l	mg/l
ammonia nitrogen	not tested	not tested	mg/l	mg/l	mg/l	mg/l
nitrate nitrogen	not tested	not tested	mg/l	mg/l	mg/l	mg/l
total dissolved solids	not tested	not tested	mg/l	mg/l	mg/l	mg/l

## Wastewater Treatment Standards

- ▶ Levels of treatment that can currently be achieved by an ATU or PBTS via DOH permitting:
  - When choosing a treatment method aside from a conventional, baseline system, the goal is to achieve a higher treatment standard in order to:
    - Reduce the impact on the environment and public health.
    - Overcome a site condition that would otherwise render the chosen location unsuitable for the proposed structure or use.
  - These main difference between these systems and conventional, baseline treatment is the introduction of oxygen to the treatment chamber:
    - Where conventional systems have anoxic conditions in the septic tank where little treatment occurs, tanks for ATU(s) promote the growth of aerobic bacteria, which are more efficient at digesting the components of domestic wastewater.
    - Performance-based systems are generally based on ATU components.

---

---

---

---

### Wastewater Treatment Standards & system determinations:

POLLUTANT	BASIC SYSTEM STANDARDS (mg/L)	BASIC SYSTEM STANDARDS (mg/L)	Performance-Based			
			ATU	Performance-Based	Performance-Based	Performance-Based
BOD <sub>5</sub> (5-day BOD at 20°C)	120-250	< 5	0-25	0-20	0-10	0-5
TSS (Total Suspended Solids)	65-176	< 5	0-80	0-70	0-10	0-5
TN (Total Nitrogen)	36-15	15-25	not applicable	not applicable	0-20	0-2
TP (Total Phosphorus)	0-10	< 5	not applicable	not applicable	0-10	0-1
Iron (all solubles)		not applicable	not applicable	0-2000	0-2000	0-100
Ammonia Nitrogen		not applicable	not applicable	not applicable	not applicable	not applicable
Chloride		not applicable	not applicable	not applicable	not applicable	not applicable
Coliforms		not applicable	not applicable	not applicable	not applicable	not applicable
Pathogens		not applicable	not applicable	not applicable	not applicable	not applicable
Other		not applicable	not applicable	not applicable	not applicable	not applicable

### Wastewater Treatment Standards & system Operating Requirements:

- All of these concessions are based on the requirement that the systems perform as proposed. As such, they require:
  - Engineer design and review of performance by the department.
    - For ATU(s), this is done by the Bureau, and is based on NSF Standard 40 testing reports submitted by the manufacturer.
    - For PBTS(s), the design, manual, and testing results are first reviewed by the Bureau and a listing of approved components is provided.
      - The individual systems are designed by an engineer using these components.
      - The individual system designs are reviewed by the County Health Department to ensure the proposed Operating Standards can be met by the design.
        - If needed, these designs can be forwarded to the Bureau Office for review by a State Engineer.
    - For designs not based on approved components or using approved components in ways not supported by existing test documentation; there is an Innovative System application process, which is reviewed by a State Engineer at the Bureau of Onsite Sewage Programs.

9

---

---

---

---

---

---

---

---

---

---

## Operating Permit Requirements

- ▶ By rule and statute, a Biennial Operating Permit is required prior to use of an ATU or PBTS.
  - The permit application, fee, and maintenance contract must be received by the County Health Department prior to final approval of system construction.
  - The permit must specify the operating conditions, including the sampling and testing requirements that must be provided by the design engineer.
  - The permit is issued in the name of the property owner, but is mailed to the approved maintenance entity.
    - Once issued, the approved maintenance entity must handle all of the required interaction with the DOH and the homeowner (collection and payment of fees, sampling, reporting, etc.) - the homeowner should not need to contact the CHD.
    - The operating permit is non-transferrable. At the time the owner of a residence or business changes, or a tenant of a business changes, a new permit must be applied for.
    - Operating permits are not renewed - they are applied for, reviewed, and issued at the beginning of each permit cycle.

10

---

---

---

---

---

---

---

---

## ATU and PBTS Operating Permits:

- ▶ The permits bear:
  - Permit Type
  - Permit Number
  - Permit Owner and Location
  - Conditions of Operation
  - Expiration Date

ATU and PBTS Operating Permits require multiple inspections throughout the permit cycle.

Regulatory Items

Location on the Permit

11

---

---

---

---

---

---

---

---

## ATU and PBTS Annual Inspections:

- ▶ The minimum inspection and monitoring associated with the Operating Permit:
  - Is dependent on what level of treatment was deemed appropriate through the permitting process.
  - Is specified on the construction application and permit by the design engineer.
  - Must, at minimum, address the required operating parameters.
  - Must appear on the DOH Operating permit.
  - Is in addition to the annual site inspections by the CHD.
  - Must be carried out by an approved maintenance entity.

Minimum standards are summarized in memo 08-003.

12

---

---

---

---

---

---

---

---

## Maintenance Entities

- ▶ Before servicing a system, a Maintenance Entity must:
  - Be or employ a Registered Septic Tank Contractor, Licensed Plumber, or Class D Wastewater Plant Operator and:
    - Be trained by the manufacturer of each product they wish to service.
    - Obtain a Maintenance Entity Service Permit from the Health Department in the county where their business is based (Application form DH4066).
    - Sign a maintenance contract with the owner of each system they wish to service.
    - Obtain the Operating Permit for each system they wish to service (form DH4081).
- ▶ While a system is under their care:
  - The Maintenance entity must:
    - Service the system as prescribed by the manufacturer, and submit reports to the County Health Department where the system is located. The number of service reports to be submitted is 2 per year for residential, and 4 per year for commercial systems.
    - Respond to emergency calls within 36 hours, and notify the CHD of any emergency service to the system.
    - Report to the CHD when a property owner refuses to renew a maintenance contract, or when there must be an amendment to the permit.
    - Serve as the primary point of contact for both the property owner and the CHD.

Besides prescribed visits and monitoring or sampling requirements, the maintenance requirements are based on the manufacturer's training.
