SUMMARY OF PUBLIC HEARING  
SCHEDULED FOR April 30, 2009

A public hearing was held on April 30, 2009 at 2:00 PM in room 240P, 4042 Bald Cypress Way, Tallahassee, Florida. Dale Holcomb presided and David Hammonds represented the Department. The meeting was recorded.

No members of the public were present.

One written comment was received via e-mail during the 21-day period following March 6, 2009, publication of the Notice of Proposed Rulemaking. The e-mail was read into the record. The e-mail contained a request for the department to include language that had recently been approved by the Technical Review and Advisory Panel. The effect of the language is to reduce loading rates for several soil textures and changed the unobstructed area calculation.

The Public Hearing was closed at 2:17 PM.
