Concisely summarize this month's activities.:

We have received 37 total responses for the survey. One community partner who is a local Hispanic business owner was assisting with completing additional surveys. He had stated he had approximately 25 households which would be completing the surveys. As of the present time we have not been able to contact him or his business (possibly out of business). We are going to proceed with the survey results we presently have without any additional responses. If these are received before our next community partners meeting they will be incorporated into the survey totals. Utilizing population numbers gathered in the survey approximately 142 people or 40% of the target population households have completed the survey. 15 households had more than 5 people living in them and 11 households had 4-5 people living in them. We are waiting for responses from our community partners for a finalized meeting schedule in April to go over survey responses. At that time priority issues and concerns will be identified and targeted to be addressed through community action.
